

FOR IMMEDIATE RELEASE

**NATIONS VALUATION SERVICES IMPLEMENTS
PLATINUM DATA SOLUTIONS' REALVIEW APPRAISAL REVIEW TECHNOLOGY**

Platinum Data Solutions contributes to company's 66% increase in appraisal orders since July 2011

ALISO VIEJO, CA – APRIL 24, 2012 – Platinum Data Solutions, a premier provider of comprehensive collateral valuation technologies, has announced that Columbus, Ohio-based Nations Valuation Services, a nationwide appraisal management company, has achieved a 66% increase in appraisal orders since implementing Platinum Data Solutions' RealView™ appraisal review technology in July 2011. Nations Valuation Services, which serves some of the largest lenders in the country, credits RealView appraisal management technology with its enhanced quality control processes and efficiency.

In addition to achieving consistent month-over-month increases in volume during the time it has used RealView, Nations Valuation Services has also reduced its client dispute rates by 18% and increased overall productivity by 22%. In February, the company achieved a perfect track record with all appraisal orders, with zero quality issues reported by its client lenders.

"We're getting an increased share of our lenders' business because they know we provide underwriter-ready appraisals," said Stephen French, executive vice president of Nations Valuation Services. "We're helping them to reduce risk, and we're also reducing the time and resources it takes to ensure quality on appraisals. Our clients know they don't have to worry about quality on any appraisal generated through Nations Valuation Services."

Many lenders and mortgage technologists consider RealView collateral review technology to have revolutionized the way the industry reviews residential appraisal reports. In just a few minutes, RealView subjects each appraisal report to a comprehensive evaluation that covers over 2,000 best practices rules and appraisal review guidelines, which include appraisal data points, as well as customized user-defined rules throughout all sections of the appraisal report. Without automation, the internal manual review process for any given valuation could consume 30 minutes or longer.

"Faulty and fraudulent appraisals can result in fees, fines and buybacks that can cost tens and hundreds of thousands of dollars per incident," said Phil Huff, CEO of Platinum Data Solutions. "That's why

progressive companies like Nations Valuation Services use RealView, which drives success through consistent quality. We're so pleased to support Nations Valuation Services in this massive growth in their business."

About Platinum Data Solutions

Platinum Data provides technologies that help mortgage lenders, servicers, investors and appraisal management companies value collateral, and identify and manage collateral risk. Its online platform and analytical tools are being used by hundreds of companies to perform due diligence, prevent buybacks and protect billions of dollars in assets across the U.S. The company's RealView system revolutionized the way the industry reviews appraisals, while its AVM offerings provide a truly unbiased perspective on collateral valuation. Platinum Data Solutions is based in Aliso Viejo, California and was founded in 2002. For more information, visit www.PlatData.com or email info@PlatData.com.
